

## **Recorded Real Estate Document Searches FAQ**

### **How can I check if my lien was released?**

- Searches can be completed online. Make sure the release that you find has the same grantor, grantee parties shown as the original lien and the release is recorded after the original lien.
- The body of the release will reference a document number for the original recorded document which is being released. This information can be used to cross check that the correct lien was released. Once you purchase a copy of the document and pay for it, you are able to have it mailed to you or to download it and view the information.
